## E4V and E7V Stator - Upgrade

### New unique stator design

Dear business partners,

As per previous mailing sent on 22/07/2020 concerning the upgrade of E4V and E7V stators, we are here to update you about the status of the replacement.

The unification of the stator into one single design, as shown on the images, will take effect starting from beginning of **December 2020**.

The new stator will be included into the valves package, where expected.

The following spare parts codes will be put in DEAD status :

**E4VSTA0000** = BIPOLAR stator for E4V-B, E4V-F, E4V-H, E4V-A

**E4VSTA0100** = BIPOLAR stator for E4V-B, E4V-F, E4V-H

**E4VSTA0101** = BIPOLAR stator for E4V-B, E4V-F, E4V-H, 5pz PU

**E7VSTA0000** = BIPOLAR stator for E7V

**E7VSTA0001** = BIPOLAR stator for E7V 10pz PU

And they will be replaced by the following unifying codes :

**E4VE7VSTA0** = BIPOLAR stator for E4V & E7V

**E4VE7VSTA1** = BIPOLAR stator for E4V & E7V, 5pz PU

We remain at your disposal for info and clarifications.

Kind Regards,

CAREL Deutschladn Team
