

Declaration of Consistency and Safety

Date: January 12, 2024
Product: Cool Seal, A/C Leak Sealer
Part number(s): CS-100CS, CS-100CS/6, CS-1CS, CS-2CS, CS-3CS, CS-200CS, CS-FCS

This is to certify the following aspects of the product identified above:

- The product was produced by ISO 9001/2015 certified company.
- This product will not affect the chemical properties of the oils or refrigerants within an air conditioning or refrigeration system when used in accordance with the instructions.
- At recommended dilutions, the sealant will not affect components in any way and can safely remain in a refrigerant system indefinitely.
- Cool Seal™ has been evaluated using many industry recognized standard test procedures with various HFC, HCFC and blend refrigerants along with PAG, POE and mineral oils, and has not evidenced any compatibility or functional problems. Testing has included ASHRAE 97, ASTM D877, and Spectronics-designed testing and evaluation procedures.
- Cool Seal™ is usable with natural hydrocarbon refrigerants (HCs) such as R-600a and R-290.
- This mixture is classified as not hazardous according to regulation (EC) 1272/2008 [CLP].
- Reports are available upon request.
