### Classification of the substance or mixture

Classification of the : Gases under pressure, Liquefied gas

substance or mixture Simple Asphyxiant

### GHS Label elements, including precautionary statements

Symbol(s) :

Signal word : Warning

Hazard statements : Contains gas under pressure; may explode if heated.

May displace oxygen and cause rapid suffocation.

Precautionary statements : **Prevention:** 

Use personal protective equipment as required.

Storage:

Protect from sunlight. Store in a well-ventilated place.

### Carcinogenicity

No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP, IARC, or OSHA.

### **SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS**

Chemical nature : Substance

Chemical name	CAS-No.	Concentration

#### **SECTION 4. FIRST AID MEASURES**

Inhalation : Remove to fresh air. If breathing is irregular or stopped,

administer artificial respiration. Use oxygen as required, provided a qualified operator is present. Call a physician.

Skin contact : Rapid evaporation of the liquid may cause frostbite. If there is

evidence of frostbite, bathe (do not rub) with lukewarm (not hot) water. If water is not available, cover with a clean, soft cloth or similar covering. Call a physician if irritation develops

or persists.

Eye contact : Rinse immediately with plenty of water, also under the eyelids,

for at least 15 minutes. In case of frostbite water should be lukewarm, not hot. If symptoms persist, call a physician.

Ingestion : Unlikely route of exposure. As this product is a gas, refer to the

inhalation section. Do not induce vomiting without medical

advice. Call a physician immediately.

Notes to physician

Indication of immediate medical attention and special treatment needed, if

necessary

: Treat frost-bitten areas as needed.

### **SECTION 5. FIREFIGHTING MEASURES**

Suitable extinguishing media : Use extinguishing measures that are appropriate to local

circumstances and the surrounding environment.

Water mist Dry powder Foam

Carbon dioxide (CO2)

Specific hazards during

firefighting

: Contents under pressure.

Heating will cause pressure rise with risk of bursting Cool closed containers exposed to fire with water spray. Product is not combustible under normal conditions.

However, this material can ignite when mixed with air under pressure and exposed to strong ignition sources.

Do not allow run-off from fire fighting to enter drains or water

courses.

Vapours are heavier than air and can cause suffocation by

reducing oxygen available for breathing.

Some risk may be expected of corrosive and toxic

decomposition products.
Fire may cause evolution of:

Hydrogen fluoride Carbon oxides Carbonyl halides

Halogenated compounds

Special protective equipment for firefighters

: In the event of fire and/or explosion do not breathe fumes. Wear self-contained breathing apparatus and protective suit.

No unprotected exposed skin areas.

Exposure to decomposition products may be a hazard to

health.

#### SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures Immediately evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

Wear personal protective equipment. Unprotected persons

must be kept away.

Remove all sources of ignition.

Avoid skin contact with leaking liquid (danger of frostbite).

Ventilate the area.

After release, disperses into the air.

Vapours are heavier than air and can cause suffocation by

reducing oxygen available for breathing. Avoid accumulation of vapours in low areas.

Unprotected personnel should not return until air has been

tested and determined safe.

Environmental precautions

Prevent further leakage or spillage if safe to do so.

The product evapourates readily.

Prevent spreading over a wide area (e.g. by containment or oil

barriers).

Methods and materials for containment and cleaning

up

: Do not direct water spray at the point of leakage.

Allow to evaporate.

### **SECTION 7. HANDLING AND STORAGE**

### Handling

Precautions for safe

handling

Handle with care.

Avoid inhalation of vapour or mist.

Do not get in eyes, on skin, or on clothing. Wear personal protective equipment.

Pressurized container. Protect from sunlight and do not expose

to temperatures exceeding 50 °C.

Follow all standard safety precautions for handling and use of

compressed gas cylinders. Use authorized cylinders only.

Protect cylinders from physical damage.

Do not puncture or drop cylinders, expose them to open flame

or excessive heat.

Do not pierce or burn, even after use. Do not spray on a naked

flame or any incandescent material.

Do not remove screw cap until immediately ready for use.

Always replace cap after use.

Advice on protection against fire and explosion

Do not spray on a naked flame or any incandescent material.

Keep away from direct sunlight.

Fire or intense heat may cause violent rupture of packages.

Vapours may form explosive mixtures with air.

The product is not easily combustible.

### **Storage**

Conditions for safe storage,

including any incompatibilities

Keep containers tightly closed in a cool, well-ventilated place.

Keep away from direct sunlight.

Protect cylinders from physical damage. Store away from incompatible substances.

Further information on storage conditions

: Keep only in the original container at temperature not

exceeding 50°C

Advice on common storage : Do not store together with:

Oxidizing agents

### SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Protective measures : Do not breathe vapour.

Avoid contact with skin, eyes and clothing.

Ensure that eyewash stations and safety showers are close to

the workstation location.

Engineering measures : Local exhaust

Eye protection : Goggles

Hand protection : Protective gloves

Skin and body protection : Impervious clothing

Wear cold insulating gloves/ face shield/ eye protection.

Respiratory protection : In case of insufficient ventilation wear suitable respiratory

equipment.

Wear a positive-pressure supplied-air respirator.

Hygiene measures : Avoid breathing vapours, mist or gas.

Keep working clothes separately.

Ignition temperature : 368 °C

Method: Auto-ignition temperature

#### **SECTION 10. STABILITY AND REACTIVITY**

Chemical stability : Stable under normal conditions.

Possibility of hazardous

reactions

: Hazardous polymerisation does not occur.

Conditions to avoid : Pressurized container. Protect from sunlight and do not

expose to temperatures exceeding 50 °C.

Can form a combustible mixture with air at pressures above

atmospheric pressure.

Do not mix with oxygen or air above atmospheric pressure.

Incompatible materials : Reactions with alkali metals.

Hazardous decomposition

products

: Halogenated compounds

Carbon oxides Hydrogen fluoride Carbonyl halides
